Universitas Sembilanbelas November Kolaka

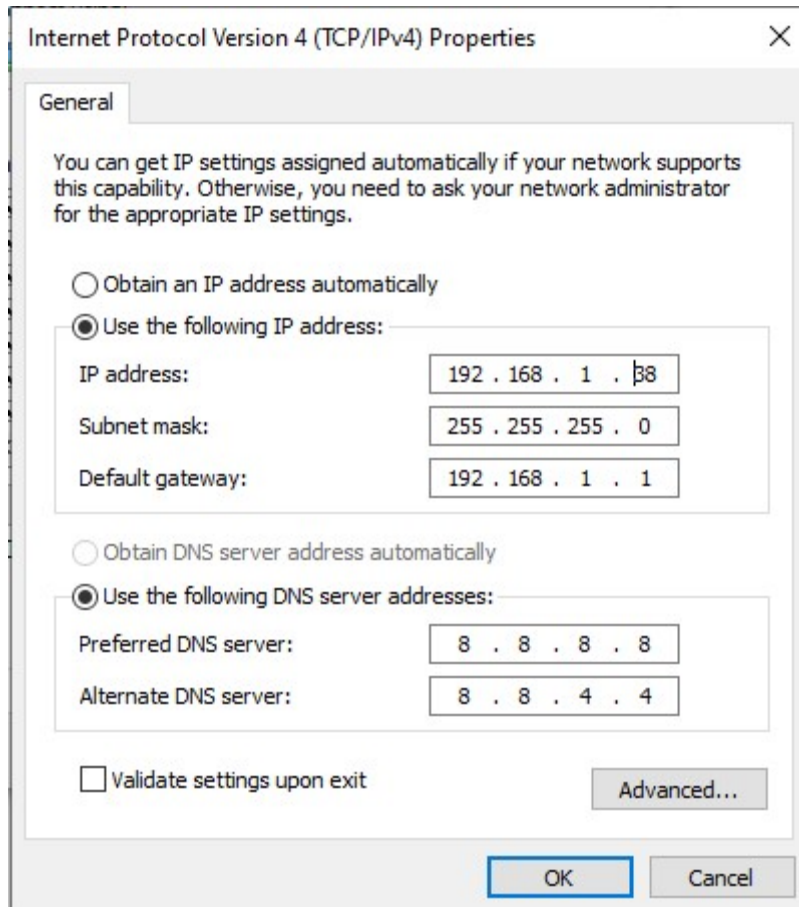

Jl Pemuda No 339, Tahoa, Kecamatan Kolaka, kabupaten Kolaka, Provinsi Sulawesi

Tenggara

Email : mardianto.itsc@gmail.com

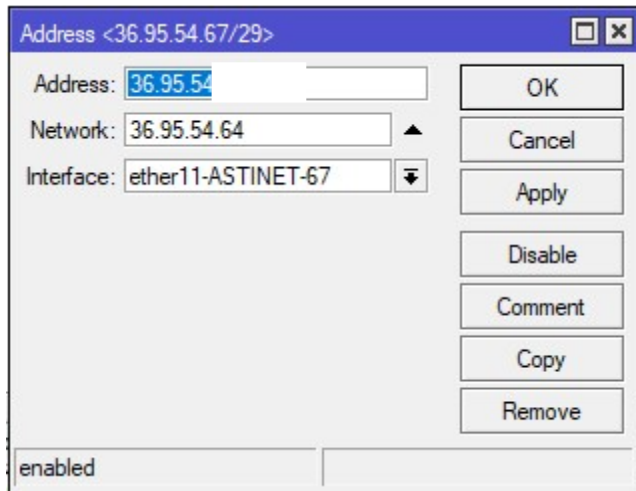

Setting Komputer server Local

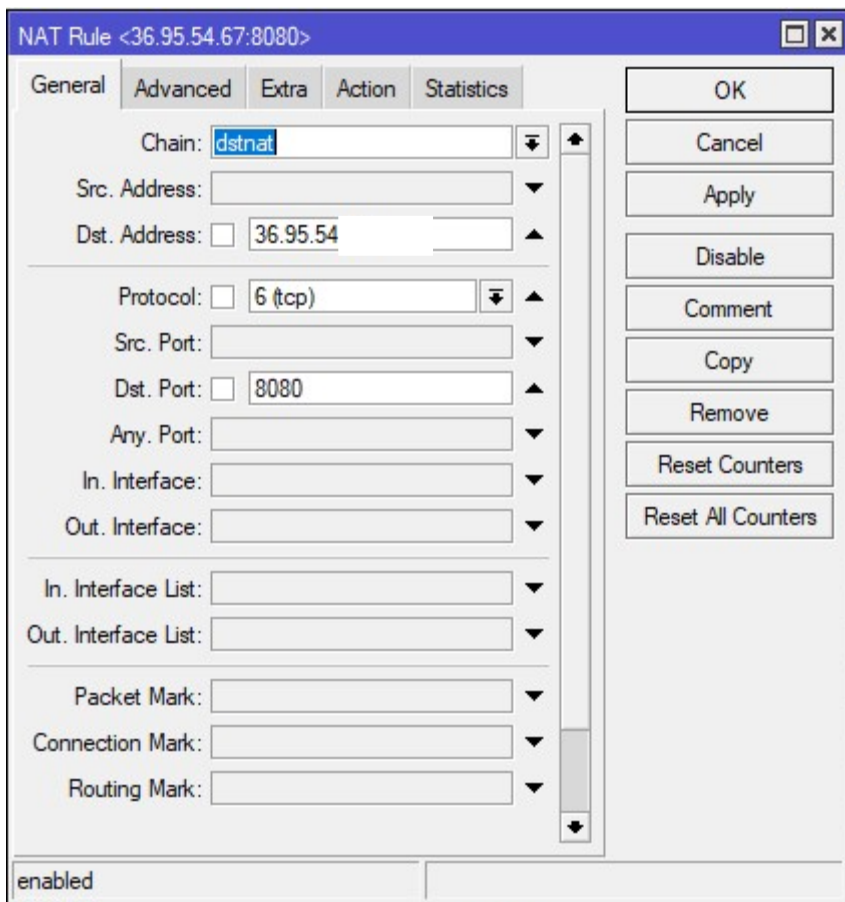

Setting Mikrotik

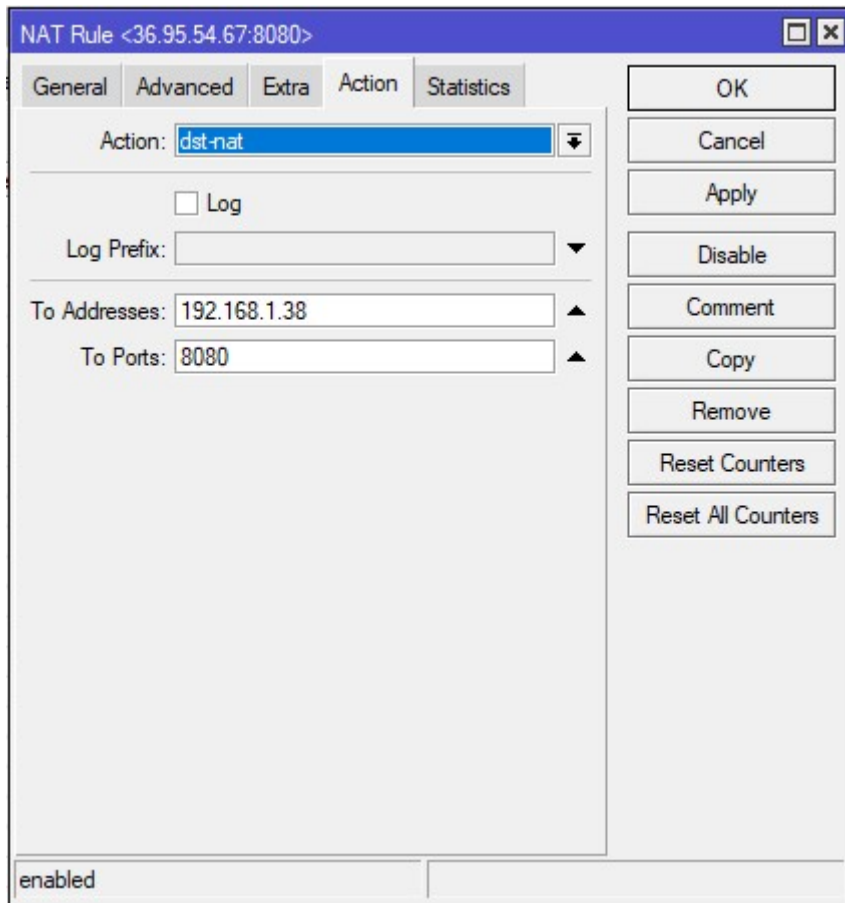

Ip->address- cek IP publik seperti gambar berikut

Kemudian Copy public, lalu pilih IP-> NAT pilih icon + kemudian masukan seperti gambar berikut

Setelah itu masuk ke bagian action ikuti gambar sebagai berikut

Setelah selesai lakukan pemanggilan server di jaringan internet dengan alamat : <http://36.95.54.8080/dashboard/> maka hasilnya seperti berikut

Welcome to XAMPP for Windows 8.0.28

You have successfully installed XAMPP on this system! Now you can start using Apache, MariaDB, PHP and other components. You can find more info in the FAQs section or check the HOW-TO Guides for getting started with PHP applications.

XAMPP is meant only for development purposes. It has certain configuration settings that make it easy to develop locally but that are insecure if you want to have your installation accessible to others.

Start the XAMPP Control Panel to check the server status.
